# Cikis Progress Forward Chemical Management

This document **confirms Ongetta S.r.l.'s commitment to reducing chemical contaminants along the production chain**, through an improvement process undertaken in collaboration with Cikis S.r.l., a consultancy company specialized in sustainability for the fashion sector.

The process, carried out between March and August 2024, included:

- **A chemical assessment of 14 Ongetta suppliers** (yarn, fabric, and dyeing suppliers), focused on environmental and social performance, as well as chemical process management. The analysis was conducted through specific questionnaires aimed at evaluating the current state of chemical management of the suppliers and identifying areas for improvement along the supply chain.
- **The structuring of commitment letters shared with suppliers**, encouraging them to adopt the ZDHC protocol and implement the MRSL throughout the production chain.

"Cikis Progress Forward" confirms Ongetta's commitment to the corporate sustainability transition process.

**Serena Moro**  
(CEO and Founder of Cikis S.r.l.)
